PIERA

lighting ABOUT SPACE

Installation

Please power off before installing the product.

1. Take out the inner and outer covers of the lamps separately.

2. Determine the position of punching holes on the ceiling.
   Determine the fixing hole position of the outer cover of the
   lamp on the ceiling with a marking pen, punch the expansion
   screws at the hole position, punch the self-tapping screws without
   locking screws.

3. Align the three holes of the outer cover with the screws and rotate
   the cover to lock the screws.

4. Connect the inner and outer covers of the luminaire with the safety
   cord and earth wire (plug and play)

5. Unplug the external power supply from the ceiling and connect the
   power cord.

6. Tilt the inner cover of the luminaire 45° into the inside of the outer
   cover of the luminaire, and flatten the inner cover inside the outer
   cover.
